a. Please tell us about your career goals and why you have chosen your CFCC program of study.

I intend to complete the Wooden Boat Building diploma program and apply that training toward a Maritime Archaeology bachelors degree. Ultimately I would like to build traditional boats in order to further our understanding of our maritime heritage.

c. Tell us about yourself. Tell us about any obstacles you have overcome as well as what quality/qualities about yourself you are most proud of?

I am a disabled veteran, and father of three training to start a small business in wooden boat manufacture.

Dear Mr. Alexander,

Thank you for the generosity of the North Carolina Coastal and Piedmont Chapter, Antique and Classic Boat Society for the thoughtful scholarship in the amount of \$1,000.00. I am beginning my last semester in Cape Fear Community College's Wooden Boat Building program. This program has had a great impact in my transition from military to the civilian workforce. I intend to build and restore historically significant boats as well as continue the long tradition of wooden boat building in my community and through Scouting programs. This scholarship will help fund supplies and expenses for the 2020 Summer semester.

During the Spring semester the class began the construction of a glued lapstrake canoe, a lapstrake centerboard sail dinghy, a cold-molded sportfishing skiff and a carvel planked Abaco sailing dinghy. While this semester was shortened the class made a lot of progress laying the hulls for each of these boats. Back in Virginia I was able to set up a home workshop and continue the restoration of an Asa Thompson rowing skiff during the break. I intend to continuing building and rigging the CFCC boats and finishing the Wooden Boatbuilding program this summer.

I look forward to meeting you and fellow classic boat builders and enthusiast at a future NC C&P event to personally extend my appreciation. Until then, please pass on to the entire Chapter my most heartfelt Thank You.

Sincerely,

Shane Snow

Post Acceptance Bio. Tell us about yourself *(optional)*

My name is Cody Murphy. I am from Dandridge, Tennessee and I have been lucky enough to find an amazing program that I will be excited to turn into a lifetime career. I love boating, fishing, and camping. As of right now, my goal is to start working on boats full time. I think I am going to go into electrical because it is very challenging and I am not scared to go out of my comfort zone.

a. Please tell us about your career goals and why you have chosen your CFCC program of study.

My career goals are to work at a boat manufacturer. I really like catamarans and dual console boats. These boats would be the main type that I would want to build. However, I will be just as happy to work on any boat. They say you never work a day in your life if you love your job.

c. Tell us about yourself. Tell us about any obstacles you have overcome as well as what quality/qualities about yourself you are most proud of?

One of my favorite qualities that I have is that I am not afraid to do whatever it takes to get a job done. I always put forth 110% effort into my work.

d. Approximate CFCC Graduation Date

08/07/2020

July 2020

Dear Mr. Alexander and NC Coastal & Piedmont, Antique and Classic Boat Society Members,

I want to thank you from the bottom of my heart. Your generosity is greatly appreciated by my family and I. I am happy to use your investment to continue my training. It certainly helps me and takes a lot of weight off my shoulders. I have definitely found what I want to do for a career. I have had an absolute blast participating in my class and learning new information and new skills. With your contribution, I get to continue learning. After I finish my Boat Manufacturing and Service diploma, I plan to enroll in the Wooden Boat Building class as well as the Captains course in order to obtain my Captains License. I want to thank you once more for the generosity that you have shown me.

Thank you,

Cody
